

Compare Easy3PL with leading warehouse management systems

A practical guide for 3PL warehouses evaluating billing, inventory, e-commerce fulfillment, mobile execution, cross docking, FTZ support, and enterprise WMS fit.

EXECUTIVE LENS

The right WMS is not always the biggest WMS. It is the system that best matches how your warehouse receives, stores, picks, ships, bills, reports, and serves customers.

EXCELLENT FIT

Independent 3PL warehouses

Teams running warehouse work, billing, and inventory control.

EXCELLENT FIT

E-commerce 3PLs

Fast fulfillment with scanner-driven execution.

EXCELLENT FIT

FTZ-capable warehouses

Structured FTZ reporting and warehouse-side process control.

Built for warehouse operators who need to get real-world work done quickly and efficiently.

Easy3PL is strongest for third-party logistics teams that need practical control over receiving, inventory, orders, e-commerce fulfillment, client-specific billing, payments, reporting, mobile execution, cross docking, and compliance-sensitive warehouse workflows.

Easy3PL wins when a 3PL needs a focused operating system for real-world warehouse work, client billing, e-commerce fulfillment, mobile execution, and FTZ-ready process control. It is especially strong for operators who need to get daily work done quickly and efficiently with an outstanding iOS and Android mobile app in their hands.

3PL native workflow

Clients, receipts, inventory, orders, eOrders, storage rules, fees, invoices, payments, and reporting.

Built-in billing focus

Storage, receiving, shipping, labor, custom fees, weekly/monthly invoicing, and client payments.

FTZ warehouse support

Admission data, traceability, outbound removals, broker packets, and FTZ reports.

Mobile warehouse execution

Handheld-friendly workflows for warehouse activity and eOrder batch picking.

Shipping and e-commerce tools

Shopping integrations, shipping management, batch picking, and shipment intelligence.

B2B and B2C in one WMS

Run business-to-business warehouse operations and direct-to-consumer fulfillment together.

Practical controls

Roles, permissions, audit history, reporting, and structured workflows.

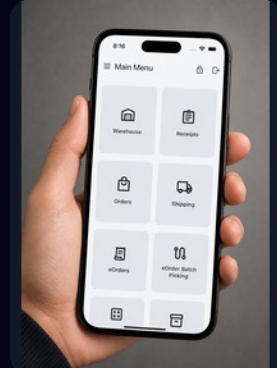

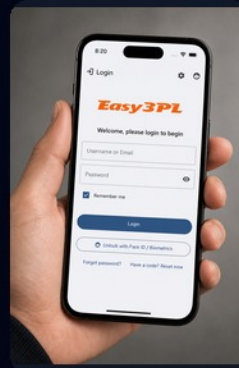

IOS AND ANDROID MOBILE APP

Put real warehouse power in the user's hand.

The Easy3PL mobile app is one of the clearest reasons to choose Easy3PL. Modern warehouses do not move at desk speed. Receiving, picking, moving inventory, checking exceptions, and staying connected to orders need to happen where the work is happening.

"The world moves at such a fast pace that users need the power to handle most tasks on a device in their hands."

Mobile-first execution

BEST-FIT GUIDE

Independent 3PL warehouses

Excellent fit

Receiving, inventory, fulfillment, client billing, storage fees, and reporting in one practical WMS.

E-commerce 3PLs

Excellent fit

Marketplace/order integrations, eOrders, batch picking, shipping workflows, and client-specific billing.

FTZ-capable warehouses

Excellent fit

Structured FTZ admission, inventory traceability, removal, and broker-handoff support.

Large automated enterprises

Evaluate requirements

Robotics orchestration, advanced labor standards, yard optimization, slotting, and deep ERP programs.

CAPABILITY VIEW

Compare by operational need, not just vendor size.

This table shows Easy3PL's fit by capability and names other systems a buyer may want to compare when that specific need is the main priority.

CAPABILITY	EASY3PL FIT	OTHER OPTIONS TO COMPARE
3PL client billing and storage invoicing	Very strong	Extensiv, CartonCloud, Infor
Warehouse receipts and inventory control	Strong for focused 3PL workflows	Manhattan, Blue Yonder, SAP, Oracle, Infor
E-commerce fulfillment	Very strong, powered by Easy3PL shopping integrations	ShipHero, Extensiv, CartonCloud, Deposco
Shopping integrations	Very strong for 3PL e-commerce fulfillment workflows	Extensiv, CartonCloud, ShipHero
Cross docking	Very strong for fast inbound-to-outbound warehouse flow	Manhattan, Blue Yonder, Infor
Mobile and handheld workflows	Very strong	Extensiv, CartonCloud, ShipHero, Infor
FTZ warehouse-side support	Strong	Specialized compliance and global trade platforms
Labor, yard, slotting, robotics	Best evaluated case by case	Manhattan, Blue Yonder, Oracle, Infor
Enterprise ERP integration	Focused WMS approach	SAP, Oracle, Infor

COMPETITIVE LANDSCAPE

Easy3PL is not trying to be every WMS. That is the point.

Enterprise WMS suites

Manhattan, Blue Yonder, SAP, Oracle, Infor

Strong choices for large distribution networks, automation-heavy buildings, labor programs, yard workflows, and deep ERP integration.

3PL and fulfillment specialists

Extensiv, CartonCloud, ShipHero, Deposco

Closer to Easy3PL's market because they focus on 3PL operations, e-commerce fulfillment, integrations, mobile execution, billing, or omnichannel workflows.

Freight and logistics platforms

Magaya

Often strongest where the core business is cargo movement, forwarding, customs brokerage, and freight accounting.

SELECTION CHECKLIST

Easy3PL belongs on your shortlist if these questions sound familiar.

Do you bill clients for storage, receiving, shipping, labor, and custom warehouse fees?

Do you need B2B warehouse operations and B2C e-commerce fulfillment in the same software?

Do you need e-commerce orders and traditional warehouse receipts in the same WMS?

Do you need strong cross-docking workflows for fast inbound-to-outbound movement?

Do warehouse teams need mobile or handheld workflows?

Do you need FTZ admission, traceability, removal, and broker-handoff support?

Do you need a focused 3PL system more than a global enterprise supply-chain suite?
